Summary

Software Engineer and ML/AI Engineer with backend experience in FastAPI, C++, and end-to-end ML/RAG pipelines. Created Anchorium — an AI fintech compliance platform, a business automation agency, and a quant trading system. Currently optimizing C++ backend systems at Cadence Design Systems. Seeking Software Engineer, ML/AI Engineer, or FinTech/Quant Engineering roles.

Skills

Programming & Databases: Python, C++, SQL, JavaScript, TypeScript, HTML, CSS, Bash
AI & Machine Learning: Artificial Intelligence, Machine Learning, Deep Learning, Neural Networks, Scikit-learn, TensorFlow, Keras, Model Evaluation & Deployment
Generative AI: Large Language Models (LLMs), LangChain, Retrieval-Augmented Generation (RAG), Vector Databases, Prompt Engineering, Google Gemini API, GitHub Copilot
Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, EDA, Feature Engineering
Backend & APIs: Flask, FastAPI, REST APIs, WebSockets, Flask-SocketIO
FinTech & Trading: Algorithmic Trading Systems, Broker API Integration (Angel One SmartAPI), Python-C++ Interop (pybind11)
Tools & Platforms: Git, GitHub, RedHat Linux, Perforce, Jupyter Notebook, Google Colab, Hugging Face, VS Code

Experience

Software Trainee | Voltus R&D Team May 2026 – Jul 2026
Cadence Design Systems, Noida *Certificate*

- Optimized tap-to-node search across 700K+ taps and 350K+ patterns, cutting runtime from ∼2.5 days to ∼4 hours (∼93% reduction), through algorithmic and query optimization.
- Wrote and validated 200+ test cases to verify product functionality and catch regressions across releases, using GitHub Copilot to speed up test generation.
- Applied lexer and parsing concepts to parse and analyze software reports, extracting new parameters for downstream processing, in a RedHat Linux environment using Perforce and C++.

ML Trainee Jul 2025 – Aug 2025
Winnovation, New Delhi *Certificate*

- Built an end-to-end ML pipeline for house price prediction on a dataset of 25,000+ rows and 19 features, covering data cleaning, feature engineering, model training, and evaluation.
- Trained and benchmarked 5+ models including Linear Regression, Random Forest, XGBoost, and a Neural Network (TensorFlow/Keras), achieving best RMSE of ∼$28,000 on held-out test data.
- Reduced training data preprocessing time by ∼40% by building reusable Scikit-learn pipelines for encoding, scaling, and missing-value imputation across all 19 features.

Projects

Anchorium — Omni-Engine (AI Fintech Compliance)

- Co-founded Anchorium, a pre-seed B2B fintech startup, and am building the Omni-Engine — a self-hosted, multi-agent AI system for Indian–US cross-border financial compliance.
- Architected a FastAPI + Next.js Retrieval-Augmented Generation pipeline with five specialized agents, including a citation lineage graph feature for traceable, auditable AI-generated outputs.
- Built an investor-ready financial model and a 10-slide pitch deck with custom SVG charts to support fundraising.

Anchorium Automation Agency

- Co-founded a business-automation agency that designs, builds, and operates automated customer-communication systems across WhatsApp, Instagram, and email for growing businesses.
- Built a Lead Recovery & CRM layer with direct integration to Meta's official WhatsApp Graph API, automated follow-up sequencing, and a human-in-the-loop handoff the moment a customer replies.
- Delivered a unified dashboard for leads, conversations, and campaign reporting, using Meta's approval-first message templates and built-in consent/opt-out enforcement.

Anchorium Trades (Python + C++)

- Built a hybrid Python + C++ intraday algorithmic trading system integrated with Angel One SmartAPI for live market data and order execution, with a stock-agnostic signal engine and automated risk management.
- Achieved a 94% win rate (17 of 18 trades) and ₹22,496 net profit in a single live paper-trading session on a high-volatility stock.
- Engineered a 19-point parity check and a 29/29 automated test suite confirming paper-trading and live-trading logic consistency; certified "Verified & Ready for Live Trading."

Achievements

- **Developed Anchorium** — built and lead a pre-seed venture spanning AI fintech compliance (Omni-Engine), a business automation agency, and an algorithmic trading system (Anchorium Trades).
- Formed early partnerships and business tie-ups for Anchorium Automation Agency across real estate, hospitality, healthcare, and education sector businesses.

Education

Bachelor of Technology – Computer Science 2023 – 2027
Guru Gobind Singh Indraprastha University, New Delhi *CGPA: 8.52/10*

- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Database Systems, Python Programming

Certifications

AI Foundations Associate — Oracle University 2025 | Certificate
AI/ML Certification — Samsung Innovation Campus Dec 2025 – Mar 2026 | Certificate
